Anne & Scope
JITEE is a peer-reviewed journal, focuses on international economics, economic development and, more importantly, the interface between trade and development. The links between trade and development economics are critical at a time when both fluctuating commodity prices and trade liberalisation and agreements can radically affect the economies of countries.

JITEE is designed to meet the needs of international and development economists, economic historians, applied economists and policy makers. The international experts who make up the journal's Editorial Board encourage contributions from economists worldwide.

Notes for Contributors
All submissions should be made online at the International Journal of Trade & Economic Development Manuscript Central site (link to http://mc.manuscriptcentral.com). New users should first create an account. Once a user is logged onto the site submissions should be made via the Author Centre.

Authors should prepare and upload two versions of their manuscript. One should be a complete text, while in the second all document identification identifying the author should be removed from files to allow them to be sent anonymously to referees. When submitting files authors will have the ability to define the non-announced version as ‘File not for review’. When submitting your manuscript, please upload all of your original source files.

Footnotes should be used only where necessary to avoid interrupting the continuity of the text. They should be numbered consecutively using superscript Arabic numerals. They should appear at the end of the main text, immediately before the list of references.

Submissions should include a reference list, in alphabetical order, at the end of the article. The content and format should conform to the following examples.

Book:
Industrial structure: Capital markets
Cambridge University Press.

Edited text:
A business of national

Article in edited volume:
Kitchen, J. 1974. Lawrence Dicksee, depreciation and the double-account system. In Debits, credits, finance and profits provide a copy of their paper in exact accordance with the conventions listed in the preceding notes. If the final version of the paper is substantially different from the acceptable version then publication may be delayed by the need to return manuscripts to authors for necessary revisions. Authors should note that, following acceptance for publication, they will be required to provide not only a hard copy of the final version, but also a copy on a virus-free disk, preferably in MS-Word format or as a Latex file, if possible. Authors sending a Latex file should also supply a pdf version. Authors will also be required to complete a Publishing Agreement form assigning copyright to the Publisher.

Page proofs will be sent for correction to a first-named author, unless otherwise requested. The difficulty and expense involved in making amendments at the page proof stage make it essential for authors to prepare their typescript carefully:

It is a condition of publication that authors assign copyright or license the publication rights in their articles, including abstracts, to Taylor & Francis. This enables us to ensure that all content of the articles is available online immediately following publication and that authors receive a complimentary pdf copy of their article. Authors are themselves responsible for obtaining permission to reproduce copyright material from other sources.

Corresponding authors will receive free online access to their article through our website (www.informaworld.com) and a complimentary copy of the issue containing their article. Reprints of articles published in this journal can be purchased through Rightslink.
Deputy Director General: International Trade and Economic Development Division (ITED). Purpose. The International Trade and Economic Development (ITED) Division provides leadership on South Africa's trade policy, to promote economic development. It further aims to build an equitable multilateral trading system that facilitates development and strengthens trade and investment links with key economies. In particular, ITED seeks to foster African development, through regional and continental integration and development, aligned to the objectives of the New Partnership for Africa's Devel... The book offers advanced and contemporary readings in international trade and economic development, constructed on various fundamental topics that define the realm of this subject. The book brings together many of the issues that are considered staple reading for a course in trade and development, but was previously unavailable in a comprehensive manner. It offers systematic coverage of the relevant and state of the art research in trade and development. This includes detailed analysis of important sub-topics, such as, trade and the labour market, trade and public economics, topics in the theo International Trade and Economic Development Chapter 30 IB Economics International barriers to development if” Over-specialisation if” If a country is dependent on a narrow range of exports they face great vulnerability and uncertainty if” If a tropical country that is reliant on tourism revenues will be limited if the global tourist trade is damaged as a result of a global slowdown in economic growth if” Countries.Â finished goods so that developed countries become trapped as suppliers of raw materials International barriers to development
