Material design is one of the hottest trends of the last 2 years. It started as a set of guidelines for Google services, as a means to unify their user interfaces. But today many professional designers adopt its principles - just because it is usability-focused and looks cooler than simple flat design. If you want to start designing material websites and apps like a pro, first check out what Google says about this trend, then browse this gallery of free material design resources and pick something for you.Ā
