Toxic and Non-Toxic Plants List. ASPCA Animal Poison Control Center Phone Number: (888) 426-4435. This list contains plants that have been reported as having systemic effects on animals and/or intense effects on the gastrointestinal tract.Â If you believe that your animal is ill or may have ingested a poisonous substance, or if you have any further questions regarding the information contained in this database, contact either your local veterinarian or the APCC 24-hour emergency poison hotline at 1-888-426-4435.

Poisonous plants are plants that produce toxins that deter herbivores from consuming them. Plants cannot move to escape their predators, so they must have other means of protecting themselves from herbivorous animals. Some plants have physical defenses such as thorns, spines and prickles, but by far the most common type of protection is chemical. Over millennia, through the process of natural selection, plants have evolved the means to produce a vast and complicated array of chemical compounds in Travel topics > Stay healthy > Poisonous plants. Poisonous plants. Contents. 1 Poison ivy, poison oak, and poison sumac. 1.1 Poison ivy. 1.2 Poison oak. 1.3 Poison sumac. 1.4 Treatments. 2 Stinging nettles. 3 Giant hogweed. 4 Fungi. 5 See also. While it is of course unwise to eat any unknown plant, as there are literally thousands of poisonous species, there are some plants travellers may encounter which can cause problems after merely touching them. When enjoying outdoor activities such as hiking in
