Feed evaluation is the testing of feed quality, providing information on the composition of feed or feed ingredients as well as suitability for poultry...Â Feeds and feed ingredients can be evaluated physically as well as chemically. The physical evaluation of feed mostly provides preliminary information on the quality of the material. It involves assessing physical qualities such as weight, colour, smell and whether the material has suffered from any contamination by other materials. Chemically, feed is made up of water and dry matter. The dry matter contains organic and inorganic compounds.Â The central key issue in these models is feed quality, which can only be obtained through feed evaluation. Further information. McDonald, P., Edwards, R. A., Greenhalgh, J. F. D. & Morgan, C. A. (2002).

Buy Feeding Systems and Feed Evaluation Models (Cabi Publishing) by Michael Theodorou, James (Jim) France (ISBN: 9780851993461) from Amazon's Book Store. Everyday low prices and free delivery on eligible orders. Temporarily out of stock. Order now and we'll deliver when available. We'll e-mail you with an estimated delivery date as soon as we have more information. Your account will only be charged when we dispatch the item. Dispatched from and sold by Amazon. Gift-wrap available. Quantity Feed evaluation concerns the use of methods to describe animal feedstuffs with respect to their ability to sustain different types and levels of animal performance. The main themes of the book are methods of feed evaluation, current feeding systems, and mechanistic mathematical modeling. No other title brings together methods, systems and models under one cover. ...more. Get A Copy. Kindle Store.
