## CONTENTS

### 1 The Purposes of Action Research
- Action Research in Classrooms and Schools  1
- Research Conceptualized  2
- An Action Research Routine: Systematic Processes of Inquiry  4
- Using Action Research  5
- Case Study: Teacher Action Research  5
- Characteristics of Action Research  9
- Working Developmentally: Enlarging the Circle of Inquiry  11
- Summary  13

### 2 Understanding Action Research: Paradigms and Methods
- Introduction: Teaching as a Process of Inquiry  14
- Objective Science and Experimental Research  15
- Understanding Human Social Life: Naturalistic Inquiry  18
- Objective Science and Naturalistic Inquiry: A Comparison  21
- Gaining Insight: Meaning, Interpretation, and Qualitative Research  23
- Research Relationships in Classrooms and Schools  25
- The Social Principles of Action Research: Not Just a Technical Routine  27
- Conclusion  28
- Summary  29

### 3 Initiating a Study: Research Design
- Setting the Stage: Creating a Productive Research Environment  31
- With Head, Heart, and Hand: The Human Dimensions of Action Research  31
- Working Principles of Action Research  34
  - Relationships  34
  - Communication  34

INDEX 234
Action research is one of those terms that we hear quite often in today’s educational circles. But just what does it mean? If you ask three people to define action research, you may find yourself with three different responses. Typically, action research is undertaken in a school setting. It is a reflective process that allows for inquiry and discussion as components of the research. Themes in education that teachers should be constantly researching and educating themselves about their area of expertise, this is different from the study of more educational questions that arise from the practice of teaching. Implicit in the term action research is the idea that teachers will begin a cycle of posing questions, gathering data, reflection, and deciding on a course of action. Action research seeks transformative change through the simultaneous process of taking action and doing research, which are linked together by critical reflection. Kurt Lewin, then a professor at MIT, first coined the term "action research" in 1944. In his 1946 paper "Action Research and Minority Problems" he described action research as "a comparative research on the conditions and effects of various forms of social action and research leading to social action" that uses "a spiral of steps, each of
