Frank D. Bean. Gray Swicegood. “The Mexican American population is the fastest growing major racial/ethnic group in the United States. During the decade 1970–1980, the Mexican origin population increased from 4.5 million to 8.7 million persons. High fertility, not immigration, was responsible for nearly two-thirds of this growth. Recent and historical evidence shows that women of Mexican origin or descent bear significantly more children than other white women in the United States. *Mexican American Fertility Patterns* clarifies the nature and magnitude of these fertility differences by analyzing patterns of childbearing both
