PART I
Basic Medical Microbiology

Chapter 1  Microbial Taxonomy, 2
   Classification, 2
   Nomenclature, 2
   Identification, 3

Chapter 2  Bacterial Genetics, Metabolism, and Structure, 5
   Bacterial Genetics, 5
   Bacterial Metabolism, 17
   Structure and Function of the Bacterial Cell, 21

Chapter 3  Host-Microorganism Interactions, 26
   The Encounter between Host and Microorganism, 26
   Microorganism Colonization of Host Surfaces, 28
   Microorganism Entry, Invasion, and Dissemination, 32
   Outcome and Prevention of Infectious Diseases, 40

PART II
GENERAL PRINCIPLES IN CLINICAL MICROBIOLOGY

SECTION 1: SAFETY AND SPECIMEN MANAGEMENT

Chapter 4  Laboratory Safety, 45
   Chemical Safety, 47
   Fire Safety, 48
   Electrical Safety, 49
   Handling of Compressed Gases, 49
   Biosafety, 49
   Exposure Control Plan, 51
   Employee Education and Orientation, 51
   Disposal of Hazardous Waste, 51
   Standard Precautions, 52
   Engineering Controls, 54

Chapter 5  Specimen Management, 62
   General Concepts for Specimen Collection and Handling, 62
   Specimen Workup, 76

SECTION 2: APPROACHES TO DIAGNOSIS OF INFECTIOUS DISEASES

Chapter 6  Role of Microscopy, 78
   Bright-Field (Light) Microscopy, 78
   Phase Contrast Microscopy, 85
   Fluorescent Microscopy, 86
   Dark-Field Microscopy, 90
   Electron Microscopy, 91

Chapter 7  Traditional Cultivation and Identification, 93
   Principles of Bacterial Cultivation, 93
   Bacterial Cultivation, 103
   Principles of Identification, 105
   Principles of Phenotype-Based Identification Schemes, 113
   Commercial Identification Systems, 117
   Chromatography, 119

Chapter 8  Nucleic Acid-Based Analytic Methods for Microbial Identification and Characterization, 120
   Overview of Molecular Methods, 120

Chapter 9  Immunochemical Methods Used for Organism Detection, 147
   Production of Antibodies for Use in Laboratory Testing, 147
   Principles of Immunochemical Methods Used for Organism Detection, 148
Chapter 28  *Vibrio, Aeromonas, Plesiomonas, and Chromobacterium, 371*

- General Characteristics, 371
- Epidemiology, 371
- Pathogenesis and Spectrum of Disease, 371
- Laboratory Diagnosis, 373
- Antimicrobial Susceptibility Testing and Therapy, 378
- Prevention, 378

Section 10: **Gram-Negative Bacilli and Cocccobacilli (MacConkey-Negative, Oxidase-Positive)**

Chapter 34  *Haemophilus, 403*

- General Characteristics, 403
- Epidemiology, 403
- Pathogenesis and Spectrum of Disease, 403
- Laboratory Diagnosis, 403
- Antimicrobial Susceptibility Testing and Therapy, 407
- Prevention, 409

Section 11: **Gram-Negative Bacilli That Are Optimally Recovered on Special Media**

Chapter 35  *Bartonella and Afipia, 410*

- Bartonella, 410
- Afipia felis, 414

Chapter 36  *Campylobacter, Arcobacter, and Helicobacter, 416*

- Campylobacter and Arcobacter, 416
- Helicobacter, 421

Chapter 37  *Legionella, 424*

- General Characteristics, 424
- Epidemiology and Pathogenesis, 424
- Spectrum of Disease, 425
- Laboratory Diagnosis, 426
- Antimicrobial Susceptibility Testing and Therapy, 428
- Prevention, 428

Chapter 38  *Brucella, 430*

- General Characteristics, 430
- Epidemiology and Pathogenesis, 430
- Spectrum of Disease, 431
- Laboratory Diagnosis, 431
- Antimicrobial Susceptibility Testing and Therapy, 433
- Prevention, 433
Chapter 39  
*Bordetella pertussis* and *Bordetella parapertussis*, 435  
- General Characteristics, 435  
- Epidemiology and Pathogenesis, 435  
- Spectrum of Disease, 435  
- Laboratory Diagnosis, 436  
- Antimicrobial Susceptibility Testing and Therapy, 438  
- Prevention, 438

Chapter 40  
*Francisella*, 440  
- General Characteristics, 440  
- Epidemiology and Pathogenesis, 440  
- Spectrum of Disease, 440  
- Laboratory Diagnosis, 440  
- Antimicrobial Susceptibility Testing and Therapy, 442  
- Prevention, 442

Chapter 41  
*Streptobacillus moniliformis* and *Spirillum minus*, 444  
- *Streptobacillus moniliformis*, 444  
- *Spirillum minus*, 445

**SECTION 12: GRAM-NEGATIVE COCCI**

Chapter 42  
*Neisseria* and *Moraxella catarrhalis*, 447  
- General Characteristics, 447  
- Epidemiology, 447  
- Pathogenesis and Spectrum of Disease, 447  
- Laboratory Diagnosis, 447  
- Antimicrobial Susceptibility Testing and Therapy, 452  
- Prevention, 452

**SECTION 13: ANAEROBIC BACTERIOLOGY**

Chapter 43  
Overview and General Considerations, 455  
- General Characteristics, 455  
- Epidemiology, 455  
- Pathogenesis and Spectrum of Disease, 456  
- Specimen Collection and Transport, 457  
- Anaerobic Media, 459  
- Prevention, 461

Chapter 44  
**Laboratory Considerations, 463**  
- Macroscopic Examination of Specimens, 463  
- Direct Detection Methods, 463  
- Cultivation, 463  
- Approach to Identification, 466  
- Antimicrobial Susceptibility Testing and Therapy, 476

**SECTION 14: MYCOBACTERIA AND OTHER BACTERIA WITH UNUSUAL GROWTH REQUIREMENTS**

Chapter 45  
*Mycobacteria*, 478  
- *Mycobacterium tuberculosis* Complex, 478  
- Nontuberculosis  
  - Mycobacteria, 481  
  - Laboratory Diagnosis of Mycobacterial Infections, 486  
  - Antimicrobial Susceptibility Testing and Therapy, 505  
- Prevention, 508

Chapter 46  
**Obligate Intracellular and Nonculturable Bacterial Agents, 510**  
- *Chlamydia*, 510  
- *Rickettsia, Orientia, Anaplasma, and Ehrlichia*, 518  
- *Coxiella*, 521  
- *Tropheryma whippelii*, 522  
- *Clymmatobacterium granulomatis*, 522

Chapter 47  
**Cell Wall–Deficient Bacteria: Mycoplasma and Ureaplasma, 525**  
- General Characteristics, 525  
- Epidemiology and Pathogenesis, 525  
- Spectrum of Disease, 526  
- Laboratory Diagnosis, 526  
- Susceptibility Testing and Therapy, 529  
- Prevention, 532

Chapter 48  
**The Spirochetes, 533**  
- *Treponema*, 533  
- *Borrelia*, 536  
- *Leptospira*, 539
PART IV
Parasitology

Chapter 49  Laboratory Methods for Diagnosis of Parasitic Infections, 543
General Characteristics, 544
Epidemiology, 544
Pathogenesis and Spectrum of Disease, 547
Laboratory Diagnosis, 558
Approach to Identification, 564
Organism Identification, 578
Antimicrobial Susceptibility Testing and Therapy, 613
Prevention, 615

PART VI
Virology

Chapter 51  Laboratory Methods in Basic Virology, 718
General Characteristics, 718
Viruses That Cause Human Diseases, 721
Laboratory Diagnosis of Viral Infection, 735
Prevention of Viral Infection, 767

PART V
Mycology

Chapter 50  Laboratory Methods in Basic Mycology, 629
Overview of Clinical Mycology, 629
General Features of the Fungi, 629
Taxonomy of the Fungi, 632
Practical Classification of the Fungi, 634
Virulence Factors of the Medically Important Fungi, 636
General Considerations for the Laboratory Diagnosis of Fungal Infections, 642
Extent of Identification of Fungi Recovered from Clinical Specimens, 645
General Considerations for the Identification of Molds, 653
General Morphologic Features of the Molds, 657
Hyaline, Pauciseptate Molds: The Zygomyccetes, 660
Hyaline, Septate, Monomorphic Molds: The Dermatomycetes, 662
Hyaline, Septate, Monomorphic Molds: The Opportunistic Mycoses, 669
Hyaline, Septate, Dimorphic Molds: Systemic Mycoses, 674
Septate, Dematiaceous Molds, 683
Pneumocystis jiroveci (an Atypical Fungus), 695

The Yeasts, 696
Commercially Available Yeast Identification Systems, 702
Conventional Yeast Identification Methods, 703
Antimicrobial Susceptibility Testing and Therapy, 704
Antifungal Susceptibility Testing, 709

PART VII
Diagnosis by Organ System

Chapter 52  Bloodstream Infections, 778
General Considerations, 778
Detection of Bacteremia, 784
Special Considerations for Other Relevant Organisms Isolated from Blood, 794

Chapter 53  Infections of the Lower Respiratory Tract, 798
General Considerations, 798
Diseases of the Lower Respiratory Tract, 801
Laboratory Diagnosis of Lower Respiratory Tract Infections, 807

Chapter 54  Upper Respiratory Tract Infections and Other Infections of the Oral Cavity and Neck, 814
Diseases of the Upper Respiratory Tract, Oral Cavity, and Neck, 814
PART VIII
Clinical Laboratory Management

Chapter 62 Laboratory Physical Design, Management, and Organization, 915
- Space Requirements and Organization of Work Flow, 915
- Regulation of the Microbiology Laboratory, 918
- Selection of Diagnostic Tests, 921
- Cost Accounting, 924
- Budgeting, 926
- Inventory Control, 926
- Interviewing and Hiring Employees, 927
- Organization of the Microbiology Laboratory, 928
- Design of Laboratory Handbook for Clinical Staff, 929
- Design of Laboratory Requisition Form, 929
- Design of Laboratory Workcard, 930
- Design of Laboratory Report Form, 930
- Writing a Procedure Manual, 930
- Production of Statistical Reports, 932

Chapter 63 Quality in the Clinical Microbiology Laboratory, 934
- QC Program, 934
- Specimen Collection and Transport, 934
- Standard Operating Procedure Manual (SOPM), 935
- Personnel, 935
- Reference Laboratories, 935
- Patient Reports, 935
- Proficiency Testing (PT), 935
- Performance Checks, 938
- Antimicrobial Susceptibility Tests, 938
- Maintenance of QC Records, 939
- Maintenance of Reference QC Stocks, 939
- QA Program, 940
- Q-Probes, 940
- In-House QA Audits, 940
- Conducting a QA Audit, 943
- Continuous Daily Monitoring, 943
Chapter 64  Infection Control, 945
  Incidence of Nosocomial Infections, 945
  Types of Nosocomial Infections, 945
  Emergence of Antibiotic-Resistant Microorganisms, 946
  Hospital Infection Control Programs, 947
  Role of the Microbiology Laboratory, 947
  Characterizing Strains Involved in an Outbreak, 948
  Preventing Nosocomial Infections, 948
  Surveillance Cultures, 950

Chapter 65  Sentinel Laboratory Response to Bioterrorism, 953
  General Considerations, 953
  Government Laws and Regulations, 953
  Laboratory Response Network, 954

Appendix: Answers to Case Studies, 958

Glossary, 973
Diagnostic Microbiology and Infectious Disease keeps you informed of the latest developments in clinical microbiology and the diagnosis and treatment of infectious diseases. Packed with rigorously peer-reviewed articles and studies in bacteriology, immunology, immunoserology, infectious diseases, mycology, parasitology, and virology. The journal examines new procedures, unusual cases, controversial issues, and important new literature.
