Electronic resources devoted to the arts have witnessed profound growth over the past decade. Image search engines, digitized archival materials, and decentralized communication networks are slowly but surely reshaping the research landscape. Works of art too fragile for handling have been given new permanence (as much as anything is permanent on the web). Online Electronic Resources "Librarians invest time and resources in creating reference Web sites, because doing so extends four familiar library service functions into cyberspace: 1. Selection . 2. Endorsement . 3. Organization .
