OECD Economics Department Working Papers. The Political Economy of Climate Change Mitigation Policies. OECD Economics Department Working Papers. Working papers from the Economics Department of the OECD that cover the full range of the Department's work including the economic situation, policy analysis and projections; fiscal policy, public expenditure and taxation; and structural issues including ageing, growth and productivity, migration, environment, human capital, housing, trade and investment, labour markets, regulatory reform, competition, health, and other issues. The views expressed in Climate change must be stopped. But who will do the stopping? Who, in other words, could be the political subject of an anticapitalist climate revolution? I am convinced this social agent could be, and indeed must be, the global working class. Yet to play this role, the working class must develop an emancipatory ecological class consciousness. The OMCJ campaign thus epitomizes both the challenges and opportunities for organized labor engendered by the economic and ecological crises. But without a doubt, a red-green coalition and an ecosocialist alternative in South Africa represents an alternative to just-transition orthodoxy – a truly radical labor politics in the age of climate change. On Labor's Terms.

politics of climate change in Argentina. This overview contextualises the third. section on the governance of CDM in Argentina, as it is presented in theory and as. it plays out in practice. I conclude with some reflections on the politics and political.Â Recently, studies of elites with an impact on the political agenda have been scarce in regard to sustainable development, energy efficiency, and sustainable energy, with the exception of those we have conducted in recent years ( Parker 2011, Parker et al. 2013). Clean Development Mechanism studies of the Argentine case refers only marginally to energy transition (Newell 2014).
