One imperative of Chinese modernity was to ceaselessly bring excitement and passion to the individual, urging and enticing the latter to join the nationalist project. However, this idealist endeavor demanded (...) more power than the individual could summon within a coherent and rational consciousness. divergence of Greek and Chinese medicine/. Shigehisa Kuriyama. p. cm. A historical map of conceptions of the body must, this book argues, be charted in this ambiguous space between belonging and possessing, between body and self. The body is unfathomable and breeds astonishingly diverse perspectives precisely because it is a basic and intimate reality. The task of discovering the truth of the body is inseparable from the challenge of discovering the truth about people.
