Destination Dunkirk is a reprint of a book first published in 1973. It is essentially a history of the BEF in France, starting with pre-war planning for a response to a German invasion in the west right up to the evacuation at Dunkirk that ended in June 1940. There's a certain kind of person who will enjoy reading this book, and I am not that type of person. Allow me to explain. The evacuation of Allied forces from Dunkirk was a remarkable accomplishment. The people who do tend to garner ink in this volume are the various officers within the combatant armies. This fact is evident not only within the narrative but is also seen in the selection of illustrations. There are 53 black-and-white photographs, which is actually a pretty good number, but of those 53 photos, 37 are of officers. The Dunkirk evacuation, code-named Operation Dynamo, also known as the Miracle of Dunkirk, was the evacuation of Allied soldiers during World War II from the beaches and harbour of Dunkirk, in the north of France, between 26 May and 4 June 1940. The operation commenced after large numbers of Belgian, British, and French troops were cut off and surrounded by German troops during the six-week long Battle of France. In a speech to the House of Commons, British Prime Minister Winston Churchill called this image caption Dunkirk tells the story of British and Allied troops trapped on a beach surrounded by enemy forces in 1940. Christopher Nolan's epic World War Two film, Dunkirk, which tells the story of the mass evacuation of Allied troops from the northern coast of France in 1940, has been getting glowing reviews in India. But many are glowering over Nolan turning a blind eye to the role of Indian soldiers in the battle. In fact, while Britain and other allies were licking their wounds after Dunkirk, the Indian Army picked up the slack in North Africa and the Middle East. 'Survival story'. To be fair, Nolan has said that he approached the story "from the point of view of the pure mechanics of survival rather than from the politics of the event".
