INTRODUCTION

This catalogue contains books from the library of Erik Naggum (1965 – 2009), the Norwegian computer programmer. Wikipedia has an entry on him which provides an outline of his achievements.

While computing is by far the largest topic, with many languages, from Lisp and C++ to Dylan and Python well-represented, and numerous items on database design to artificial intelligence, there is also a considerable quantity of philosophy, mathematics, and general reference and English language material, and a decent number of titles on Objectivism.

A table of contents is provided to help in locating material. Please also use ctrl-F; an author you may be seeking can be in more than one subject area – for example Feynman in computing and physics.

Finally, I would like to thank Erik’s family for their assistance.

Richard Phillips.

   4to. 21.5cm x 27.6cm. Duplicated copies of the original Unix System III programmer's manuals - presumed as issued by Bell Labs to clients - bound in stiff pale beige card wraps, with transparent acetate covers. To front covers, the logo of Altos Computer Systems, and below its address and contacts details. To verso of title page, "copyright, Western Electric Company, Incorporated." Western Electric, the manufacturing arm of AT&T, owned a half share in Bell Labs. Altos, a 1979 start-up, focused on "multi-user and networked UNIX computer systems for commercial markets." (Wikipedia); it was sold to Acer in 1990. System III was first released outside of Bell Labs in 1982. System III, a precursor to System V - there was no official System IV - was designed to run on PDP-11 and VAX machines. The book contains a series of introductory essays on UNIX utilities, the source code control system, virtual protocol machine and compilers, among others. Each essay individually paginated. All essays attributed to staff at Bell Labs. Minor marks to the acetate covers, light soil to page edges. The type is clear and legible; pages clean, unmarked, binding firm, both volumes very nice copies. Not in COPAC; only one copy referenced in WorldCat. Uncommon. Near Fine. Original Wraps. 637. BRANDEN, Nathaniel; BRANDEN, Barbara [biographical essay]. Who is Ayn Rand? NP: [Random House?], ND. pp. 239. £4.75

Something of an oddity - possibly a proof or gallely copy? In a landscape format, it consists of copies of the pages of the Random House first printing, and thus blank to the verso, bound in card wraps. There is no publisher's statement. Still a legible, sound reading copy. Good. Wraps. (#00001761)

Grey plastic ring binder, black type to covers. Contains some xx pages of copied typescript, outlining how to promote the Ayn Rand Institute and its values to students at colleges and universities and very detailed guidelines on how to best organise and recruit new members. This copy produced c. 1985?, with material from 1984 to rear. Wikipedia has the ARI launched in 1985. Very Good. Ring binder. (#00001474)

Act from reason, and failure makes you rethink and study harder. Act from faith, and failure makes you blame someone and push harder. (Note: Barry Margolin is a regular on comp.lang.lisp, and a old lisper, probably much older than Naggum. I think Barry is a reasonable guy, but it's common for Naggum to have many online adversaries.) According to groups.google.com, there are 338 results of posts in comp.lang.lisp that contains both “naggum” and “xah”. I think that the number of posts I addressed him is probably less than 20, and his reply to me is proba... When you evaluate someone's work, especially in the context of a dead person, you have to judge it from the appropriate field or community. THIS catalogue contains books from the library of Erik Naggum (1965–2009), the Norwegian computer programmer. Wikipedia has an entry on him which provides an outline of his achievements. While computing is by far the largest topic, with many languages, from Lisp and C++ to Dylan and Python well-represented, and numerous items on database design to artificial intelligence, there is also a considerable quantity of philosophy, mathematics, and general reference and English language material, and a decent number of titles on Objectivism. A table of contents is provided to help in locating mater Please send comments and suggestions to erik@naggum.no. My personal library is now listed at LibraryThing.
